

The background of the entire page is a detailed line drawing of the Eiffel Tower's internal structure, showing the complex lattice of beams and joints. A large, dark grey arch is superimposed over the tower's frame, framing the central text. At the top of the arch, there is a small, stylized drawing of the tower's upper section. At the bottom of the arch, there are several small, stylized drawings of trees or bushes, also constructed from LEGO-like parts.

The original tower is assembled from pre-made pieces, just like a giant LEGO® model! While the Eiffel tower contains 18,038 different pieces, this LEGO version has 10,000 individual LEGO elements.

Hydraulic jacks were fitted to the shoes at the base of each leg of the real tower to allow for precise alignment. The legs on the LEGO® model also have some flexibility to allow them to be joined together precisely.

*The arches between the legs on the Eiffel tower are not load bearing, they are purely decorative – this is also true of the LEGO® model, where the arches are also for decorative purposes only.*

Gustave Eiffel engraved the names of 72 French scientists, engineers and mathematicians into the tower. On the LEGO® model the names are represented by 72 LEGO Ingot pieces.
